## **DETAILED ACTION**

### ***Allowable Subject Matter***

Claims 1-17 are allowed.

The following is an examiner's statement of reasons for allowance:

Claim 1 is allowed over the Willner et al. (6771678) Fig. 1-5 prior art that discloses a focused energy application source 12, one or more detectors 39 (col.4, l.19-32), and one or more safety beam emitters 20 but fails to disclose the limitations of the detectors positioned in a fixed position relative to said output port and oriented the same direction as said output port and said safety (low power) beam 24 is not oriented toward a preferred position of said application source or said safety beam 24 is oriented toward said application area, and wherein said safety beam 24 is at least partially reflected from said application area toward said preferred position of said application source.

Claims 2-17 have been found allowable due to their dependency on claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
